

HF6NTK

Upgrade kit for Nikon Ti six position motorised turret

The Prior HF6NTK upgrade to the Nikon model Ti-FLC-E turret allows for the control of the Nikon Ti-FLC-E turret through Prior's ProScan® III controller. This can be done with an existing turret or as part of the Nikon Ti-FLC-E purchase.

This upgrade provides the following benefits:

- Compatibility with most major imaging software packages
- Rapid switching (300ms) between adjacent cubes
- Enables motorisation of the Nikon Ti without the purchase of a HUB-B motorisation Hub
- Economic (only one filter drive required) plug and play functionality
- Compatible with the PS3J100 interactive control centre
- The Nikon Ti-FLC-E turret can be retrofitted to the manufacturer's original specification

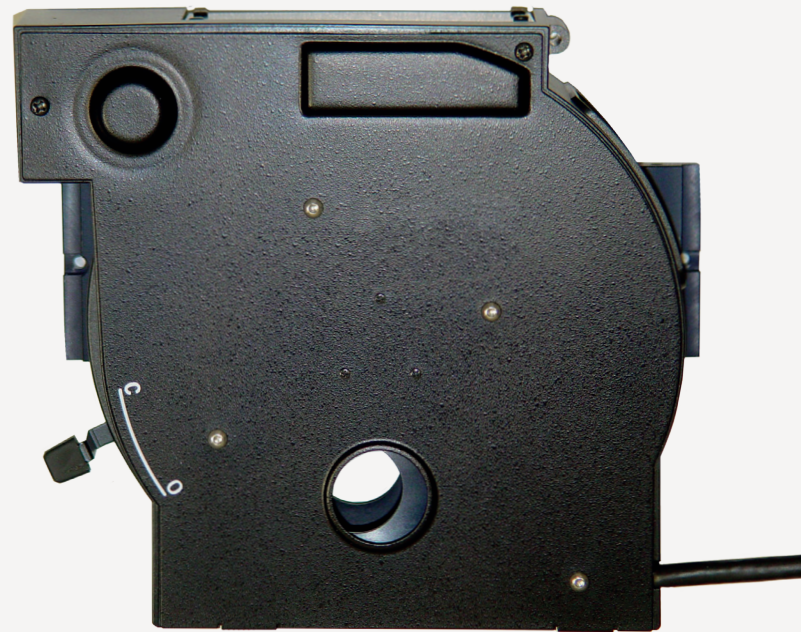

Ordering Information*

Part Number	Description
HF6NTK	Upgrade kit for new/existing Nikon Ti 6 position motorised turret.

*Nikon motorised turret is not supplied. ProScan III controller must have filter wheel drive; controller not included.
